Tools: GitHub, Git, Agile Methodology, VS Code, Figma, Slack, DB Designer, Babel, Bash

Applications Developed

DiscAssist - [GitHub](#) | [Link](#)

- Incorporated **React**, **Express.js**, and **PostgreSQL** to build a full-stack application for disc golfers to record scores
- Implemented fetch calls in **React** and handled requests with **Express.js** to render user related data
- Constructed database with **PostgreSQL** and **Node.js** to store course and scores data
- Displays graphs utilizing **Recharts** to allow the user to view scoring data over time

Recipe-Finder - [GitHub](#) | [Link](#)

- Requested data from Edamam recipe search **API** using **AJAX** to find recipes based on search parameters
- Rendered lists of recipes with the **DOM** for user to view with search specifications such as vegan, vegetarian, low-fat, etc.
- Formatted and styled with **CSS3** to enable usability for desktop, mobile, and tablet
